

# Dualco 14-Port Lubrication Manifold Model 11870

The Dualco 14-Port Lubrication Manifold is ideal for the Oil & Gas Service Industry. This manifold allows the operator to focus on an aggressive maintenance program; by simultaneously lubricating multiple valves. By using this Dualco Lubrication Manifold, one primary lubricant supply hose feeds the manifold; enabling lubrication injection to targeted valves.

Other Manifold sizes, materials options, pressure ratings and number of port options are available.

## Applications:

- Wellheads
- Pipelines
- Offshore
- Onshore
- Fracturing

## Reduces:

- Labor
- Waste
- Downtime
- Environmental Impact
- Nipple Up & Nipple Down Time

## Increases:

- Safety
- Productivity
- Profits
- Efficiency

■ A complete line of lubrication equipment, sealant fittings, valve lube sealants and accessories is available.

 Operate with Caution and Safety.

## Specifications

|                               |  |
|-------------------------------|--|
| (12) – SS-1/4 Turn Ball Valve | 15K / alternative SS-1/4 Turn Ball Valve 20K |
| (6) – Adapter                 | 4" Male x Male 9/16" Autoclave MP 316-SS     |
| (6) – Adapter                 | 6" Male x Male 9/16" Autoclave MP 316-SS     |
| Item Manifold – Offset        | 180°   |
| Construction:                 | 316-SS                                       |
| Number of Inlets:             | 2  |
| Number of Outlets:            | 12   |
| Inlet Size:                   | 1/2" / alternative 9/16"MP                   |
| Outlet Size:                  | 1/2" / alternative 9/16"MP                   |
| Dimensions:                   |  |
| Overall Length:               | 15.0"  |
| Overall Width:                | 20.0"  |
| Overall Height:               | 4.0"   |
| Fitting Connection Type:      | NPT / alternative 9/16"MP                    |
| Mounting Hole Size:           | 0.20"  |
| ■ Maximum Pressure:           | 15,000 psi (1034 Bar)                        |
